

NEOWTA

Founded 1990

NorthEastern Oklahoma WoodTurners Association

AAW OFFICIAL CHAPTER
AMERICAN ASSOCIATION
OF WOODTURNERS

PRESIDENT'S MESSAGE • BILL EFFRON

Woodturners,

Valentine's Day is only a few days away and the weather has been getting warmer after the snow. They say Spring is not far away. Did you turn something for that special person in your life? Susan reminds me, "something turned" makes a great gift.

Our demonstration for February is being given by a master creator, Roger Tice. Whether it is making a clock or turning a magical segmented piece, his talent shows. Roger is going to talk about basic segmented work. Plan on seeing Roger at the next general meeting on February 15 at 6:30 pm.

Empty bowls is coming! A member of the staff from the Food Bank will be at the meeting to tell us about their outreach programs as well as the fund raiser in May. Begin planning on what you can turn and donate to this wonderful event. NEOWTA has given between 30 and 40 pieces in years past. Let's try for 50 pieces in 2022.

Learn to Turn is taking off this winter. We have enough students for two classes. The first will be Thursdays in February 17, 24 and March 3 and 10. The second class is again on Thursdays, March 17, 24, 31 and April 7. It will great to welcome almost 15 new turners to our group. They will be able to show off their new turnings at the March General meeting (March 15) Show and Tell.

SWAT has asked NEOWTA to consider taking over a room at the August show in August. It will take a big commitment for members to both attend and to volunteer to work a session. We will discuss it further at the meeting next week.

Zoom information will be emailed out by the end of the week. See you next week (Tuesday 2/15 at 6:30).

Bill

Bill Effron

NEOWTA President

RESTING BIRCH FACE

ARTS
ALLIANCE
TULSA

Segmented turning with Roger Tice.

Segmented turning, also known as polychromatic turning, is a form of woodturning on a lathe where the initial workpiece is composed of multiple parts glued together. The process involves gluing several pieces of wood to create patterns and visual effects in turned projects.

A segmented turning can combine ring construction, stave construction, and solid, non-segmented wood as well in a single piece. However, wood expands and contracts in the direction perpendicular to its grain as a function of its moisture content, itself a function of ambient humidity. In this case, during design and assembly, the turner has to be mindful of the impact on long term structural integrity of assembling the constituent pieces into incompatible, non-parallel grain directions.

An important variation of the ring construction technique is known as "bowl from a board". Imagine a flat, square board bisected to create two identical rectangles, like two twin beds placed side-by-side to form a king-sized, square bed. Rings are created by cutting concentric semicircles from each of the two boards, one concentric half-ring a mirrored-shape of a half-ring from the other. The semicircles are typically cut with a bandsaw, but a scroll saw, jigsaw, or coping saw would work. The blade of the saw used to cut the semicircles is set at an angle from the vertical, typically 45-60 degrees, such that when each mirrored pair is glued together to form a complete ring, the rings are shaped like cross sections of a cone. The rings are then stacked to create a cone-shaped blank. An incredible variety of visual effects can be achieved as a function of how the boards are constructed before the concentric rings are cut.

The February NEOWTA General Meeting will be held on **Tuesday, February 15th at 6:30pm.**

This meeting will be **in person**, in the club! For those who are not ready to attend in person, we will have a Zoom connection as well. Contact Joe Kissinger, 918-812-0758, for the Zoo

JANUARY PRE-MEETING

JANUARY MEETING

JANUARY MEETING

Tops by Bruce Holden

1. Bat blank

2. Slice 1" disk

3. Drill 1/2" hole in center

4. Get 1/2" dowel rod

5. or, Make your own dowel rod!

6. Drive dowel in hole 1/2" past disk for spinning tip

7. Work on inside

8. Decorate inside

9. Work and decorate outside

10. Work on handle

POWER CARVING SIG

Power Carving and Pyrography at the Clubhouse!
February 22nd at 5:30pm. For all those that would like to come and join in the fun. Bring your power carving equipment and PPE, ie: face mask and hearing protection. We would like to invite all NEOWTA members who would like to learn more about carving, pyrography, and other texturing effects, to come out and learn how and what equipment is needed. There will be extra equipment to use before you purchase to make sure you get the equipment that you need to do the work you want to accomplish.
 We have plenty of room to social distance. See you there.
 - **Betty Zumwalt.**

NEOWTA LOGO

Which logo do you think is your favorite? We will be voting on NEOWTA logo at the February meeting. This logo will be used in communications as well as any future clothing, stationary, stickers...etc. If you have any questions, or a late submission, contact President Bill Effron at president@neowta.com.

AAW Presents: From Penturning to Pen Making with Mark Dreyer and John Underhill

Saturday, February 19, 2022
3:00 p.m. Eastern Time

Join us for a mini-master's program in pen making in less than two hours! Whether you're new to pen making or a seasoned veteran of the art, Mark Dreyer and John Underhill's inspiring session will feature something for you.

Professional pen making starts with attention to the details. In this demonstration, Mark Dreyer will offer a complete overview of pen making and basic penturning. From blank and component set selection and preparation, to drilling, and gluing, he will provide details and tips that will help you make the perfect pen.

Resin casting can allow you to differentiate your pens from every other pen maker by using things like label casts, embedded objects, color casts, and more. In this session, John Underhill will walk you through everything from beginning to end from setting up a casting area to handling the resin and casting your own blanks. John will give you insights about the various resins on the market and help you select the best one for the job. He will also show you the tools, molds, and supplies he uses to achieve successful casts and how they can be used to alter your results.

Key takeaways:

- Pen blank and component selection, preparation, drilling, gluing, and tips
- Techniques for casting resin pen blanks, including clear and embedded object casting

[Click here to Register](#)

Registration Notes

- All experience levels are welcome.
- The presentation is expected to last approximately 120 minutes.
- Registration is open through through **Friday, February 18, at noon** Eastern Time.

Confirmation/Receipt and Event Link

- After registering, you will receive a receipt/confirmation by email.
- A link to the event will be sent by email approximately 24-hours prior to the event. Day-of registration links will be sent immediately prior to the event.

Replay

- Advance registration includes online replay of the event. The replay will be available to registered attendees through **March 13**. Registered attendees will be provided a link via email when the replay is available for viewing.

Cost

- \$10 AAW members, \$15 all others
- Preregistration required. Replay will be available to registered attendees only.

HOLLOWING DEMO

NEOWTA held a hollowing demonstration on Saturday, January 22, 2022. There was multiple hollowing tools set up and ready for everyone to try. This let everyone see what style of hollowing tool would be best for them. We had many members and non-members come out and try the different hollowing systems. There was a lot of conversations about the ease of use for most of the systems.

Thanks to Tim Yoder, Dee Baxter, Al Merman, Jeff Bonem, Max Dunigan, Greg Zumwalt and Stan Townsend for demonstrating everyone the hollowing systems.

EMPTY BOWLS

EMPTY BOWLS

A HUNGER AWARENESS DINNER
BENEFITING COMMUNITY FOOD BANK OF EASTERN OKLAHOMA
TUESDAY, MAY 10, 2022

Woodturners over the past several years our club has been a sponsor of the Food Bank of Eastern Oklahoma. We have partner with them to provide wood turned art for their major fund raiser of the year Empty Bowls.

The 2022 event will be held on May 10. Your club would like to get 30 to 40 turned bowls to donate to the Food Bank. They auction off the bowls to the highest bidder. Since 2018 NEOWTA has donated pieces that were sold at auction for \$16,065. This money was used to provide for 64065 meals.

Are you aware that 1 in 7 Oklahomans face food insecurity. Let's all do our part to donating one bowl that can be used to support this great cause.

Should you have any questions contact **Jeff Bonem** at jsbonem@gmail.com.

VIDEO OF THE MONTH

Turning for Food - Kitchen Related Projects

With Nick Cook

In this DVD, Nick demonstrates how to create nine different items that are useful in the kitchen.

All videos were captured in full HD from 3 different angles providing excellent views of the projects and tool usage . . . making it easy for you to follow every move!

The items include: a rolling pin, spurts (stirring stick), plate, honey dipper, coffee shop, wine stopper, bowl, an amazing salt urn and a pepper mill

Nick is a full time production turner producing a wide variety of gift items, one of a kind bowls and vessels as well as work for furniture makers and millwork contractors. He spends much of his time teaching both individuals and groups throughout the country. He is a founding member of the AAW (American Association of Woodturners) and has served as vice president and conference coordinator. Nick was named the 12th honorary lifetime member of the AAW. He has written numerous articles for various publications including *American Woodturner*, *Woodworkers Journal* and *American Woodworker*.

Call or email Dee Baxter to reserve your copy to start learning today!

Dee's contact information is 918/407-5045 or plow55@aol.com.

P e n s f o r t h e T r o o p s N e e d s Y o u !

NEOWTA members, turn a pen for the troops!

Would you like to help turn pens? We now have pen kits that you can check out at the monthly meeting and take home to turn! Just bring them back to the next monthly meeting.

We have 6 different finishes, Gold, Satin Gold, Chrome, Satin Pearl, Copper, and Gun Metal.

There will also be pen blanks for you to use as well, or use what you have in your shop.

We will give, how ever many we have, to the Blue Star Mothers on a quarterly basis.

If you have any questions, contact **Arthur Barber** @ 918-671-2437.

VOLUNTEERS NEEDED

Have you ever thought, I could do that?
Well, we would like you to do that!

We are needing help with the monthly video operators. Even if you do not know how, you will be taught how to operate the cameras, computer and controllers. This is your chance to step up and be a viable part of the monthly meetings. The more volunteers we get the less work it becomes for each volunteer. Contact Bill Effron at president@neowta.com or see Bill Malsom before the January meeting.

Please Take an Active Part in **YOUR** Club!

YOUR PROJECT PHOTOS

Everyone loves Show & Tell after our demonstrations! We only have Show & Tell at our meetings every 4 months. We would like to show off your current work on the Website and in the Newsletter each month.

We ask that you send photos, you can send as many as you want, to the club mailbox newsletter@neowta.com by the first Tuesday of each month. This allows plenty of time for the photos to be added to the newsletter. Please also send a description—type of wood, size, finish, any special information.

AMAZON SMILE

Do you shop at Amazon?

Earn cash donations for NEOWTA in four easy steps by shopping at Amazon Smile:

Log onto smile.amazon.com

Type in Northeastern Oklahoma Woodturners Association under “pick your own charitable organization”

Click on “Search”

“Select” Northeastern Oklahoma Woodturners Association to start earning 0.5% from Amazon Smile on eligible purchases for our club.

You shop. Amazon gives.

It's that EASY! There is no charge to you or NEOWTA and you are still eligible for your Amazon Prime perks.

Remember to shop at smile.amazon.com to generate Amazon Smile donations for NEOWTA.

LEARN TO TURN

Beginning Turning Classes

We have a maximum of 8 and a minimum of 5 students per class. You will receive a lot of individual attention. Classes will be populated on a first come first served basis.

Outline of classes

Class 1

Introduction to the Lathe, Personal Safety Techniques, Equipment, Tools, Holding Tools, Body Position, Habits.

Learning to cut small beads and coves.

Tools: Roughing Gouge, Parting tool, 3/8" Spindle Gouge or 3/8", Bowl Gouge.

Project: Beads & Coves

Class 2

Review of Safe Procedures, Holding tools, Body Position.

Cutting larger, smoother, beads and coves. Making a tenon to fit a Chuck.

Tools: Roughing Gouge, Parting Tool, 3/8 or 1/2" Spindle or Bowl Gouges.

Projects: Make a Christmas Tree. Make a dibbler (or dibble if your prefer).

Class 3

Review of Safe Procedures

Platter design, shaping, making smooth cuts.

Practice Turning; Small vase "Dry Weed Pot".

Tools: Same as Class 1 and 2 + round nose or bowl scraper (if you have one).

Project: Make a small platter—additional methods to attach wood to the lathe.

Class 4

Review of Safety. Review of cuts.

Turning a Small bowl from green wood.

Class Evaluations.

How to join the class

1. You must be a member of NEOWTA to take the classes.
2. We will have four classes on successive Thursdays or Sundays as the case may be. (To allow you to practice!)
3. The total cost is only \$140. That is only \$35 per class. This is very inexpensive as wood turning classes go.
4. People who have taken the class previously have appreciated the instructors and the feeling of confidence that they gained from the experience. Even if you have some self taught experience, it is likely that you will benefit from this class because you will benefit from not needing to make all the mistakes yourself.
5. All classes are in the NEOWTA (heated and air-conditioned!) classroom using one of our full sized lathes. All wood, tools, and equipment required for the class will be furnished—even sandpaper! But you are invited to bring your own face shield and tools if you wish. If you do not have tools, please do not buy them before the first class.
6. Each class is approximately 3 to 4 hours in duration.
7. The instructors are experienced and will demonstrate each step prior to student practice.
8. Safety is emphasized throughout all classes. We want you to go home with something that you made, not a lump or cut!
9. Students are expected to clean up their work stations at the end of each class.
10. We have been using the same basic curriculum for the past 4 years but our teaching techniques continue to evolve and improve based on feedback from previous students. We want you to be comfortable and we want you to learn.

Contact **Bill Effron** at learntoturn@neowta.com if you are interested in this class.

LEARN TO TURN

Skew Class

This one day class runs from 9:00am – 4:30pm and is given on a Saturday. The **cost for the workshop is \$50.**

EVERYTHING YOU NEED TO KNOW ABOUT THE SKEW

PRESENTED by **AL MIRMAN**

The Skew and Learn How to Use It

Tool Architecture - Description

Sharpening

Lathe Preparation

Spindle Turning Basics

Roughing Out, Peeling Cut

Planing Cut

Catches

Tied Underhand Grip

V-Grooves or V-Cut

Shoulder Cut (or Facing Cut)

Saucer Cut

Pommel Cut

Parting Off Cut

Rolling Cut (Beads & Coves)

Negative Rake Scraping -Boxes, Bowls

Grooving (End grain/Face grain)

Class projects utilizing above skill sets

Spinning Top (Small top, larger top, 2 piece top)

Bowl (that's right, make a complete bowl with a skew)

Scratch Awl w/music wire, copper ferrule & exotic wood handle

Spec dimension Maple spindle (utilizing template)

Finials (one from Pine, one from Ebony)

Contact **Al Mirman** at skewclass@neowta.com , or 505-250-7430, if you are interested in this class.

MENTORING PROGRAM

Our mentoring program is one of the unique benefits of our club. Our mentors can help with basic to complex turning and teach safety along the way. This is a great way to start out or hone your skills with complex tasks taught by turners skilled in specific areas of turning. Our mentors are volunteers and are dedicated to sharing information on all facets of woodturning. Rest assured however, that all of our mentors are easy to work with. Most often the mentor opens his/her shop to the applicant at a mutually agreed upon time and schedule. So how does the mentoring program actually work? The program is flexible. Just contact a mentor below and arrange a time and date to meet. Are you a new turner? I want to make sure we meet your needs!

Are you a Beginning Woodturner?

How to use NEOWTA mentoring Program:

Email [Arthur Barber](#), or talk to him at a meeting, and describe your skills or needs. He will do his best to get you matched up with a mentor. Mentors and mentored must be members of NEOWTA. Let me introduce you to our Mentors and their skill set they bring to the table:

- ★ **Patrick Collins** 918-886-5524 Tulsa, OK - pjc21549@windstream.net - All kinds of turning help.
- ★ **John Scott** 918-231-5856 Tulsa, OK - johnscott1059@cox.net - Basics, bowls, boxes and hollow forms.
- ★ **Roger Tice** 918-321-3210, Sapulpa, OK - rocklock1@att.net - Segmented turning.
- ★ **Brad Glock** 918-213-9751, Bartlesville, OK - bradglock@yahoo.com - Basics, platters bowls, boxes, hollow forms and limited carving.
- ★ **Guy Timmons** 918-855-9000 Tulsa, OK - gwtimmons@cox.net - All kinds of turning help.
- ★ **James Adams** 918-886-5524 Pawnee, OK - pawneejames@gmail.com - Bowls, bracelets.
- ★ **Betty Zumwalt** 918-346-7193 Tulsa, OK - bettyzumwalt@affordableassistance.com - All kinds of turning help

If you would like to volunteer to be a mentor, please send an email to [Arthur Barber](#) with your name, phone number, email address and list the kind of turning you can help with.

BEADS OF COURAGE

Making boxes for the Beads of Courage program at the Children's Hospital at St. Francis Hospital is an ongoing community service project for our club.

Beads of Courage is a program for children who are seriously ill with cancer or other serious disease. The beads help them tell their treatment stories through the colored beads they receive for medical procedures, treatment milestones, and acts of bravery. Children can amass hundreds of beads during their treatment and typically string them together to form necklaces.

Our project is to turn lidded boxes for the children to use to store their beads and necklaces. Club members are encouraged to turn boxes that are between 4 and 6 inches in diameter and 6 to 8 inches tall. Box design is up to the club member. Be creative and remember these boxes are for kids. We would like some reference to Beads of Courage to be incorporated in your design.

For more info contact **Betty Zumwalt** – phone: 918-346-7193 email: bettyzumwalt@affordableassistance.com

AAW Annual International Woodturning Symposium Chattanooga, Tennessee June 23 - 26, 2022

The 2022 AAW Symposium is scheduled for June 23 - 26 in Chattanooga, Tennessee. The normal registration cost for AAW members for the full, three day event is \$345 if paid by June 1.

The AAW is offering a \$30 discount for people who participate in group registration through their local AAW chapter. We need to get a headcount to see how many GRWG members are interested in this option.

Some key points:

- We would need at least 10 people to participate to be eligible for the discount. And we need to tell the AAW by February 1 if we will be participating.
- The group registration through the GRWG would cost \$315 per person. Your payment (by check, no credit card option) would be due by mid March. Someone from the GRWG will collect the checks and send them to the AAW.
- The AAW will announce "Covid mitigation protocols", such as masking or vaccination requirements, before the event. They will provide full refunds to people who decide not to attend due to the protocols.

We need to get a headcount. If you are interested in participating in the group registration or have any questions, please contact Dave Bunge - djbunge33@gmail.com.

More details about the symposium are available here: [AAW 2022 Chattanooga Symposium](#)

A world-class lineup!

Experts from around the globe will come together again to share their techniques and insights to help you bring your woodturning abilities to the next level. You'll find demonstrations targeted to your skill level and areas of interest from these incredible featured demonstrators:

- Trent Bosch
- Kip Christensen
- Barbara Dill
- Cindy Drozda
- Keith Gotschall
- John Jordan
- Michael Kehs
- Eric Lofstrom
- Glenn Lucas
- Mike Mahoney
- Hans Weissflog

Many more demonstrators and panelists to be announced in early 2022!

Collect Dust at the Lathe

Learn the basics and your lungs will love you

Peter Fedrigon knows dust. For more than 20 years, he's hopscotched across the country as a consulting engineer on dust collection, air filtration, and system design.

For the 650 employees at the L. & J. G. Stickley factory, he designed a monster system with three 150-hp fans that suck wood dust from the plant and blow it into a towering filter dubbed the "baghouse."

He watches over 40-plus systems. At a Wrigley Brothers plant in Gainesville, Georgia, the system protects the lungs of 850 employees from sugar dust.

Variety? Peter has designed systems for rock crushers, tobacco, clay, and peanut shells. And of course, plenty of wood dust.

In the mid-1990s, he started Oneida Air, which his daughter and son-in-law now run.

In sprawling factories, there are rigid OSHA standards for dust levels, which could get out of compliance from poor dust collection and improperly maintained return air from bag-room filters.

Of course there are EPA standards for the air vented outdoors. And the explosive dust must meet National Fire Protection Act requirements.

"All the factors that apply to industry also apply to our home shops," Peter says. "Think about this: The EPA doesn't allow dust masks in factories—the dust collectors have to do all the work. That's the way it should be in your shop, too."

Peter can quote dust statistics until your eyeballs roll into the next ZIP code. But his bottom line message

is simple: "If you like to turn, you'd better get yourself a dust collector."

Microns and your lungs

If you're considering adding a dust collector to your shop (and you should), you could easily get lost in a sea of technical jargon. You'll find more explanations in the sidebar "Dust Terminology."

Most of the advertising material speaks about the ability to gather dust whose particle size is measured as micrometers, or microns.

Here's what you need to know about microns:

- There are 25,400 microns in an inch. The period at the end of this sentence is about 320 microns in diameter.
- It is the tiny particles which you breathe in that damage your lungs. The dust from 1 to 10 microns in diameter is the nasty stuff that is harmful to lung cells and causes respiratory problems—coughing, nosebleeds, sinus problems, emphysema, and bronchitis. That may explain why you develop a cold after you spend a lot of time sanding. The finer you sand, the finer the dust particles.

By comparison, wisps of tobacco smoke fit in the range of 0.01 to 1.0 microns. Of course, you know what damage tobacco smoke does to healthy lungs.

In your shop, you can sweep up the nuisance chips too big to enter your lungs. It's the tiny particles and sanding dust that should be your biggest concern.

I turned for four or five years and only occasionally wore a mask. Now, I have asthma from breathing wood dust. Bad situation—I pay for three days if I get even a puff of sawdust in the nose.

I recommend moving as much air as you can when you sand. Take good care of your lungs!

—david ramsey, phoenix-area segmented turner and retired hospital executive

AAW SAFETY

Collect dust at the source

Peter has a simple solution for gathering chips, shavings, and dust when he turns: He attaches a 4"-diameter flexible duct to his tool rest with a bungee cord, as shown in **Drawing 1**. "I don't even start up my lathe without turning on the dust collector," Peter says. "This duct is never in the way while I turn. The thin flex hose lets me move the tool rest around with ease."

When it's time to sand, Peter opens a blast gate to a second 4"-diameter duct fitted with a hood, as shown in **Drawing 2**. With two ducts running, he gets 600 to 800 cfm through his 2-hp cyclone system.

"I keep the hood opening small so the air can reach out to capture the dust. I'm getting about 99.9 percent of the dust collected right at the source."

"Remember that dust is a fire and explosion hazard, too." The dust-gathering solutions above are typical of what he has set up for the home shops of Central New York chapter members and nearby AAW chapters (word of Peter's knowledge spreads faster than dust).

The filter factor

"Dust filtration is critical," Peter says. "If you can see dust migrate through the bags when you turn on your collector, your system needs immediate attention."

Get after dust!

1. A method to gather dust while turning.
2. When sanding, add a second 4"-diameter hose fitted with a hood.

"It is important to understand the filter media and the efficiency of the media. Spun-bond polyester filter media in pleated filters is best for your shop."

"The woven or felted polyester doesn't do as good a job because it can't hold back the high dust-loading that occurs in home shops. In addition, woven filters must be cleaned often."

When you choose filters, Peter suggests you select wide-pleated cartridges. Today's top-performing cartridges can filter 99.9 percent of the dust down to .02 micron.

A better two-bag collector

Peter has helped several chapter members upgrade a two-bag collector. Among his solutions:

- Replace the 30-micron bag (standard with many collectors) with a more efficient 1- or 5-micron bag. (The replacement bag will be larger.) American Fabric Filter (americanfabricfilter.com, 800-367-3591) provides technical support for aftermarket bags.
- Replace the top bag with a pleated canister filter, which provides at least four times the media surface over a cloth bag. For details, check with your original manufacturer. Donaldson Company (airfilterusa.com, 800-667-8563) is one online source.

CLUB VIDEO LIBRARY

Librarian, **Dee Baxter**, wants you to check out the DVD library at our next meeting in May and on the members web site to see what is available for your selection and to check it out. There is a wide variety of turning DVD's available for inspiration or help in skill enhancement.

You can check out 3 DVD's per month

DVD's checked out must be returned the following month. Late fee - \$5.00 assessment per DVD per month.

Enjoy the DVDs. You can watch them more than once!

We have several DVDs that have checked out for a significant period. Please look around the house, locate those DVDs and give Dee a call. If you would like to trade DVDs, Dee will be happy to work with you. Our extensive library remains open for business. A list of the books and DVDs are on the website. If you'll contact Dee directly, he will either mail a DVD or even arrange for in-Tulsa delivery. Dee's contact information is 918/407-5045 or plow55@aol.com.

NEOWTA RAFFLE

Are you feeling lucky? NEOWTA as many items on the Raffle table for you to win! Tickets are only \$1 each or 6 for \$5. Money raised from the ticket sales help the club with financial needs. Stop by the Raffle table in the back of the room at the next meeting. Ticket sales are available during the meeting and the drawing will be held after the main program and all announcements. Winner must be present to win.

The Raffle drawing will draw 5 winners. Winners get to choose from the variety of items on the Raffle table. First winner gets first choice, 2nd winner gets 2nd choice... etc, until all winners have made their selection.

We are always looking for donations to the raffle table. If you have an item you want to donate, bring it to the meeting and talk with **Bill Bush** at the raffle table.

FROM THE NEWSLETTER EDITOR - ARTHUR BARBER

Past newsletters can be accessed from the NEOWTA website www.neowta.com/newsletter.

If you do not receive a courtesy email by the beginning of the month indicating that a new newsletter is available online, please send me your current email address.

Submissions to the newsletter are due by the last DAY of the month.

Articles, tips, web links, classified ads and other woodturning-related items are welcome! Send them to newsletter@neowta.com.

For other business inquiries, contact Northeastern Oklahoma Woodturners Association at:
